Naturally Selected: Why Some People Lead, Why Others Follow, and Why It Matters. Groundbreaking and timely, Naturally Selected unravels the mystery of leadership—why some lead, why some follow, and why it matters to every one of us.

Selected: Why Some People Lead, Why Others Follow and Why ...

Selected : Why some people lead, why others follow, and ...

The authors of Naturally Selected postulate the theory that we select our leaders based of criteria developed during early human evolution. The conditions of that time period put natural selective pressures on early humanoids and therefore affected our DNA and with it our psychology.

Fusing psychology, business, history and current affairs, Selected examines how and why leadership has evolved over tens of thousands of years, and presents a bold and compelling new 'mismatch hypothesis': that the slowness of evolution means that

there is a mismatch between modern ideas of leadership and the kind of leadership that our Stone Age brains are still wired for.

Selected: Why Some People Lead, Why Others Follow and Why it Matters (From Darwin to Obama) Mark Van Vugt Department of Social and Organizational Psychology VU University Amsterdam. Institute for Cognitive and Evolutionary Anthropology University of Oxford m.van.vugt@psy.vu.nl www.professormarkvanvugt.com.

Amazon.com: Customer reviews: Selected: Why some people ...

"Naturally Selected" is the best book I've read on leadership. And, having a master's degree in leadership communication, I've read

many books on the topic. I've always suspected that some of us are more genetically inclined to lead and some to follow - but that when push comes to shove most humans have some capacity to step up and lead.
