SME 3009 Tonearm - Old School | TONEAudio MAGAZINE

Collectors know the SME 3009 enjoyed numerous variants, especially the 3012 12-

inch model. But others exist to tantalize completists. The original 9-inch 3009 is identified by enthusiasts as 3009/1 or 3009/2 to indicate which model series is which, as well as "3009 Series II Improved."

SME Model 3009 Series II Improved precision pick-up arms combine latest design features with the same high quality engineering and finish that made their predecessors famous for more than a decade. Each arm is meticulously built and tested and will meet its specification reliably through many years of service.

(This is partly accomplished through the use of a pasty compound, supplied with the arm, which firmly binds the body of the cartridge to the headshell.) As a result, the arm has little sound of its own and, in fact, makes some cartridges sound almost overly rich in quality. (The SME 3009 Series II, by contrast, was rather bright and a little ...

The 3009 (with 9" pivot-to-stylus distance) is the arm we recommend for the home user, and it shares with the 3012 the distinction of being the most versatile conventional-type tonearm on the market today. It

has wide-range adjustments for tangency, height, static balance, torsional balance, pickup tilt, bias compensation, and tracking force.
