Sustainable Landscape Construction | Guide to Green Building Outdoors Like its predecessors, the new edition of Sustainable Landscape Construction (Publication Date: February 1, 2018) is organized around principles, recognizing that built environments, and our work in them, pose both pragmatic and ethical challenges.

Sustainable landscaping is using the efficient planning of a landscape to help lower energy costs of a building, reduce water runoff, and overall help the performance of the building.

Sustainable Landscape Construction

A Guide

Sustainable residential landscape architecture practices can help build a network of productive landscapes by using native plants communities to reconnect fragmented ecosystems in residential areas. Homeowners waste water irrigating their lawns with water that should be reserved for human consumption.

Like its predecessors, the new edition of Sustainable Landscape Construction is organized around principles, recognizing that built environments, and our work in them, pose both pragmatic and ethical challenges.

Since the publication of the first edition in 2000, Sustainable Landscape Construction has helped to spur a movement towards resilient outdoor environments, in the U.S. and throughout the world. The third edition has been updated to include important recent developments in this landscape revolution.

Sustainable Landscape Construction is a crucial complement to basic landscape construction texts, and is a one-of-a-kind reference for professionals, students, and concerned citizens.

Sustainable Landscape Construction: A

Guide to Green Building Outdoors 2nd Edition takes a new approach to the question of how to construct outdoor environments based on principles of sustainability. It has been thoroughly updated to include the most important developments in this landscape revolution, along with the latest scientific research in the field.

Published at the beginning of the twenty-first century, Sustainable Landscape Construction took a new approach to what was then a nearly new subject: how to construct outdoor environments based on...

Sustainable Landscape Construction conveys the strong opinions of its authors—they don't like PVC or too much pavement, for example. One can accept this preachiness, however, because it is balanced with detailed information that is clearly grounded in experience.
