Google Docs: Free Online Documents for Personal Use

Step 1. In Microsoft Word, click File option and then click Open. Step 2. In the Open dialog box, select your Word document then click the arrow on the Open button.

A text file (sometimes spelled textfile; an old alternative name is flatfile) is a kind of computer file that is structured as a sequence of lines of electronic text. A text file exists stored as data within a computer file system. In operating systems such as CP/M and MS-DOS, where the operating system does not keep track of the file size in bytes, the end of a text file is denoted by placing ...

TEXT File - What is it and how do I open it?

New Text Document | Free Online Notepad

In the OpenOffice.org API, a text document is a document model which is able to handle text contents. A document in our context is a product of work that can be stored and printed to make the result of the work a permanent resource. By model we mean data that forms the basis of a document and is organized in a manner that allows working with the data independently from their visual representation in a graphical user interface.
