The Business of Shipbuilding eBook by George Bruce ...

Synopsis. Expand/Collapse Synopsis. The Business of Shipbuilding thoroughly analyses vessel construction, from material receipt and preparation, to final outfitting. It explains the central role of computer technology in the design process, the growing importance of supply chain management for materials and services and the use of subcontractors. Methods of measuring progress, productivity, performance and the need for enforcing standards during construction are also discussed.

Three Virginia-class submarines per year (with the Block V costing \$3.5 billion per hull, according to Navy leaders) and a \$7.5 billion Columbia-class submarine every year starting in 2026 would mean \$18 billion in submarines each year in today's dollars, representing roughly 85 percent of the 2021 shipbuilding budget request.
