Vera Caspary, the celebrated author of *Laura*, tells her own story in this captivating autobiography. With a career that spanned from the 1920s through 1970s, one that produced over twenty novels, in addition to her many credits for film and theater, Caspary centered her life around a passion for writing. From her early experiences at an advertisement agency—where she developed a correspondence school and invented its “famed” instructor—to the struggles of being gray-listed in the McCarthy Era, Caspary constantly found a way to turn her creative needs into viable work. Caspary recalls the rest of a full life, too, including her flirtation with communism, travels across Europe, and a marriage. Caspary's skillful writing makes her incredible depictions of people, and the times in which they lived, jump off the page.

The process of elimination can be used in all aspects of life. In this book, I will walk you through how the process of elimination can be used in different aspects of life. There is no need to point out that the process of elimination is not something that I have invented but is something that is being followed by almost all humans in some way or the other in their daily ways. My intention is to make the readers aware of this concept so that the readers start applying the process of elimination consciously which will help them reach their goals effectively.

Written by one of the country's foremost urban historians, "The Great Rent Wars" tells the fascinating but little-known story of the battles between landlords and tenants in the nation's largest city from 1917 through 1929. These conflicts were triggered by the post-war housing shortage, which prompted landlords to raise rents, drove tenants to go on rent strikes, and spurred the state legislature, a conservative body dominated by upstate Republicans, to impose rent control in New York, a radical and unprecedented step that transformed landlord-tenant relations. "The Great Rent Wars" traces the tumultuous history of rent control in New York from its inception to its expiration as it unfolded in New York, Albany, and Washington, D.C. At the heart of this story are such memorable

figures as Al Smith, Fiorello H. La Guardia, and Oliver Wendell Holmes, as well as a host of tenants, landlords, judges, and politicians who have long been forgotten. Fogelson also explores the heated debates over landlord-tenant law, housing policy, and other issues that are as controversial today as they were a century ago.

We are a nation of immigrants, and every immigrant to these shores brings a story. What they have in common is this: things were bad in the country of origin, from being denied an education to having your family slaughtered in front of you. Once they get to the US, things are going tough, then less tough, and finally you get to grab your own version of the American Dream. Secrets of Success by Dr. Alexander Karat, a successful physician with his own clinic in NYC, is a valuable contribution to the genre, with an important difference: where most such bios describe a straight rags-to-riches narrative, Dr. Karat's is a rollercoaster. Or, perhaps, put in the terms of his profession, it is a cardiogram with wild peaks and valleys. From the opening phrase, "Alexander (Sasha) Karachunov was born on August 26, 1954, in the town of Armavir, Krasnodar Region, in the south of Russia," you can tell there is no room for pretense in this memoir. It is a Soviet Horatio Alger story: a boy living in a cold-water one-room flat with his single mother rises to the top, in his case the Kirov Military Medical Academy in Leningrad, an elite medical school; and does so without a bribe or a phone call - something that even people in his home town find hard to believe. Never slowing down, Alexander grabs every reward the school has to offer - student society, advanced courses, and finally the gold medal (the equivalent of summa cum laude) and a spot in the postgraduate program. Success has many fathers, they say, but in Karat's case it took just one mother, a WWII veteran who volunteered to combat on day one and finished the war as the commander of an anti-aircraft artillery battery - and ruined her health, too. She inculcated the boy with a simple code: Work hard, don't stray, stand for truth, don't give up, and the reward will find you. He stuck by it, and it worked. But she also gave him unexpected advice: rather than settle for a cozy spot in post-grad, go and serve - in the Northern Submarine Fleet, of all places. He followed the advice. The golden boy with summa and dozens of published papers turned into a humble ship doctor. But not for long; soon he would perform the kind of surgery that 30 years later would win him applause from top US surgeons at NYU. From that point on, it is up and up: as he garners every award available, from two academic degrees to professorship at the same academy to numerous publications and more gold medals at international competitions. But a boy who succeeds by hard work and talent never learns to be cautious, and in Soviet Russia it becomes his undoing. After a stint in Afghanistan he makes some politically dubious remarks - and down he goes. Now, then, America, where all his medals fail to set him apart from the rest of the huddled masses. Once again, Alexander does not give up; if he mixed cement in his native town at the age of 14, he can do it in Brooklyn at 40, too. Evenings, he hits the books - and does it again, acing every exam thrown at him by the Boards. Though nothing turns out so simple: neither residency nor the final licensing exam nor getting a job and starting your own business and protecting it from organized crime. Alexander Karat was not born with a silver spoon in his mouth and got nothing handed to him on a silver platter. But then he is not the kind of guy who goes for the silver - he goes for the gold, time and again, whether crawling home with an untreated broken leg after a gymnastics tournament or doing 126 hours of residency nonstop. As we read about the peaks young Alexander had to climb, from the famed Military Medical Kirov Academy in St. Petersburg, where a provincial boy without connections, living on less than a ruble a day, suddenly finds himself among classmates with high-ranking fathers from the military and Party elite, to the residency at NYU Medical Center, where he once again finds himself among rich kids half his age who already know how an American hospital works - it is hard not to conclude that Alexander's stubbornness and phenomenal capacity for hard work go back to those wintry streets of Armavir where he had to haul buckets of water home from a street pump. Karat's story of his rise and fall and rise again abounds in made-for-Hollywood drama: now he operates on the nuclear submarine commander 500 meters under sea - all alone, no anesthesia, no nurses - don't try it at home. Now he is about to be recruited by British Intelligence Service in Gibraltar. Now he is operating under mujahideen fire in Afghanistan. Now he

saves a patient at NYU. Finally, in Brooklyn he stands up to the Russian mobsters trying to take over his business. And then he stands up to Hurricane Sandy - and NYC Parks & Departments, too. Nothing breaks Dr. Karat. You'll never get bored with this book. And it would do you good to learn from his life, too.
