### 792 - JILLIAN BUCKLEY

Strayer's hypothesis is that being in nature allows the prefrontal cortex, the brain's command center, to dial down and rest, like an overused muscle. If he's right, the EEG will show less energy coming from "midline frontal theta waves"—a measure of conceptual thinking and sustained attention.

#### 90's "This is Your Brain on Drugs" Commercial - Extended Cut

"Dr. Hill is a researcher in evolutionary psychology, and This Is Your Brain on Birth Control is an interrogation of the things you likely didn't hear about the pill during your appointment; namely, that the pill doesn't just regulate fertility, it influences everything a woman's hormones influence." —InStyle

1997: This Is Your Brain On Drugs. Every kid from the 90s remembers it. "This is your brain on drugs." An egg sizzles on a frying pan. Then actress Rachael Leigh Cook smashes up a dimly-lit kitchen with the same frying pan. 20 years ago, The Partnership for a Drug-Free America pulled out all the stops for this public service announcement (PSA).
