India got freedom in 1947 but unfortunately it has not been able to attain the level of advancement and development as was desired; and was achievable too. This book will pave the way towards solution of our problems and resolution of disputes. It will turn the tide favourable; make the environment congenial; smash the dark clouds of despair to usher in brightness of hope; will purify the mind; and provide sublimity to the soul. A new dawn of hope will bring in a bright day of prosperity in which everybody's wishes shall be granted. A Roadmap for a Glorious India in which the economy will prosper; citizens will be contented; happy; glowing and India will again become a vishwaguru.

Sri Shirdi Sai Baba (18381918), the first one in the trinity of Sai Baba Avatars (incarnations), was the incarnation of Lord Shiva. He led the life of an ideal Sufi

saintbegging for alms; helping all, teaching the basics of morality and spirituality in his typical rural, rustic, simple, and lively manner, telling true stories of many births of his devotees and other creatures, and by his very brief and heart-penetrating comments and pieces of advice. He taught all to believe in God, who is omnipotent, omnipresent, and omniscient, and the One Malik (Master) of all and who is present in every creature. Gods grace can be achieved by anyone by earnestly remembering Him; by being moral, kind, and loving to all creatures, and by doing ones duties honestly and sincerely. Sai Baba always gave genuine assurances to those who called upon him for his miraculous grace and helped the distressed ones instantly. It is a well-known fact that Sri Shirdi Sai Babas grace is being experienced by countless people throughout the world, but only a few of such incidents are published in Sai journals and on the Internet. This book is a collection of invaluable articles on Sri Shirdi Sai Babas legendary grace and thrilling record of over two

hundred testimonies of post-Samadhi period (after 1918 till now) beneficiaries of his grace. His temples are in India, USA, UK, Canada, China, South Africa, Mauritius, and many countries. Thousands of pilgrims visit daily his Dwarka Mai Masjid and Samadhi Mandir in Shirdi (India) and Sai temples in their countries daily to obtain his gracious help. All those who are eager to receive Sri Shirdi Babas divine grace for getting instant solution of and relief in their problems and seek proper guidance shall find this book a boon.

Democratization from Above seeks to explain why some national and state governments in the developing world introduce reforms to make local governance more democratic while others neglect or actively undermine democracy at local levels of government. The study challenges conventional wisdom that local democratization is implemented as a means of granting more autonomy to local actors. Instead, Anjali Thomas Bohlen argues that local democratization offers higher level government elites

who lack control over party organizational networks an alternative means of increasing the effectiveness of local intermediaries on whom these elites rely to mobilize political support. The book starts with a focus on India and uses original data, and a combination of qualitative and quantitative evidence, to show support for the argument. The study then relies on an original cross-national dataset to show how the argument helps explain the variation in the implementation of local democratization reforms across the developing world.

With special reference to India.

Detailed analysis of the problems faced in a wide-range of jobs, highlighting the problems faced by an upright police officer.

Raj and Vaidehi, though not a perfect couple, were happy and contented. But their relationship slowly digressed towards an unbridgeable chasm. Vaidehi doubted his fidelity and questioned him often. That night the storm that hit the city also impacted the lives of Raj and Vaidehi. But does Raj go to the extreme of strangulating her? It has been a fortnight since Shabnam contacted Abdul. The operator said, "The number you dialled is out of reach." Abdul is now worried. He has to risk his lucrative job in Saudi to find the whereabouts of his ladylove with no clue of her address. He is sure Allah, the Compassionate, will find a path for him. But time is running out. Raj is cornered. The Inspector threatens to take him into custody unless he agrees to his outrageous suggestion. What will he do? How does Raj escape arrest? Can Abdul find Shabnam? Does faith and love triumph over greed and deceit?

Neuroscience research deals with the physiology, biochemistry, anatomy and

molecular biology of neurons and neural circuits and especially their association with behavior and learning. Of late, neuroscience research is playing a pivotal role in industry, science writing, government program management, science advocacy, and education. In the process of learning as experiencing knowledge, the human brain plays a vital role as the central governing system to map the images of learning in the human brain which may be called educational neuroscience. It provides means to develop a common language and bridge the gulf between educators, psychologists and neuroscientists. The emerging field of educational neuroscience presents opportunities as well as challenges for education, especially when it comes to assess the learning disorders and learning intentions of the students. The most effective learning involves recruiting multiple regions of the brain for the learning task. These regions are associated with such functions as memory, the various senses, volitional control, and higher levels of cognitive functioning. By considering biological factors, research has advanced the understanding of specific learning difficulties, such as dyslexia and dyscalculia. Likewise, neuroscience is uncovering why certain types of learning are more rewarding than others. Of late, a lot of research has gone in the field of neural networks and deep learning. It is worthwhile to consider these research areas in investigating the interplay between the human brain and human formal/natural learning. This book is intended to bring together the recent advances in neuroscience research and their influence on the evolving learning systems with special emphasis on the evolution of a learner-centric framework in outcome based education by taking into cognizance the learning abilities and intentions of the

learners.

The book examines Kerala's experience of fiscal decentralization, finances and decentralized planning of rural and urban local governments, and draws lessons for achieving sound fiscal decentralization. It presents the 5th State Finance Commission's approach and methodology on the devolution of the State taxes to local governments. This book presents a number of lessons on the transfer of financial powers, mobilization of own sources of revenue and inter-governmental transfer of funds, and argues that the outcome of fiscal decentralization in Kerala is poor or unsatisfactory due to partial and distorted implementation. It shows that transferring a large number of expenditure functions at an early stage of fiscal decentralization without the assignment of adequate administrative and financial powers has resulted in poor execution of all the functions. The study points out the need to move from partial to full fiscal decentralization.

Covers the period 1935 to 1975.

Forest Governance and Sustainable Resource Management vividly presents the current state of management and governance of forests and other natural resources in India. It focuses on the substantial underperformance and need to ensure effective implementation of the national forest policy to arrest further depletion of India's rapidly declining forest cover. The book extensively covers the history of forestry in India, the various forest policies, the legal and management frameworks, the various international conventions and protocols for dealing with climate change and how effective forest management can enable their im-

plementation. It recommends various strategic, implementational and governance reforms to deal effectively with the current situation. A highlight of this book is its extensive coverage of the Reducing Emissions from Deforestation and Forest Degradation in Developing Countries (REDD+), a climate change mitigation solution adopted by the United Nations, and India's state of readiness in implementing it. The book suggests that foresters need to overcome their siege mentality and instead work towards empowering themselves to play a more proactive role in saving India's forest resources.
