Starting in 1984, the British Transformers comic wasn't just a successful toy advert, it taught a generation of British schoolboys how to read through its exciting action packed pages. With sales that vied with 2000AD writers Simon Furman and Bob Budiansky created a generation of fan boys that have never looked back. Stuart Webb was one such reader, and in 2012 he began a journey looking through every single issue of the series, commenting on its highs and lows. He became the first person to look at every backup strip, every comedic cartoon and each editorial and how they worked together to create the most thorough exploration of a publishing phenomenon ever undertaken. It's also personal, full of humour and silliness and even the occasionally thoughtful moment. The final result is an essential read, for Transformers fans, and those interested in the history of Marvel comics in the UK and the impact this comic had on an entire generation.

Last Stands from the Alamo to Benghazi examines how filmmakers teach Americans about the country's military past. Examining twenty-three representative war films and locating them in their cultural and military landscape, the authors argue that Hollywood's view of American military history has evolved in two phases. The first phase, extending from the very beginnings of filmmaking to the Korean War, projected an essential patriotic triumphalism. The second phase, from the Korean and Vietnam Wars to the present, reflects a retreat from consensus and reflexive patriotism. In describing these phases, the authors address recurring themes such as the experience of war and combat, the image of the American war hero, race, gender, national myths, and more. With helpful film commentaries that extend the discussion through popular movie narratives, this book is essential for anyone interested in American military and film history.
