Unthinkable | mysite-2

Award-winning science writer Helen Thomson has spent years traveling the world, tracking down incredibly rare brain disorders. In Unthinkable she tells the stories of nine extraordinary people she encountered along the way. From a man who thinks he's a tiger to a doctor who feels the pain of others just by looking at

them to a woman who hears music that's not there, their experiences illustrate how the brain can shape our lives in unexpected and, in some cases, brilliant and alarming ways.

**Unthinkable: An Extraordinary Journey through the
World's Strangest Brains - Helen Thomson**

Leaving behind the scans and the clinical histories, Unthinkable ties the first-ever interviews with the people who have these rare conditions together with cutting-edge science. Through these incredible tales, Thomson casts a light on the chaos that the human mind can create.

In the process, as described in Unthinkable: An Extraordinary Journey Through the World's Strangest Brains (Ecco/Harper Collins 2018), Thomson discovered that "by putting their lives side-by-side, I was able to create a picture of how the brain functions in us all. Through their stories, I uncovered the mysterious manner in which the brain can shape our lives in unexpected—and, some cases, brilliant and alarming ways."
