Motorboat Electrical and Electronics Manual covers all inboard engine boats, from 20' to 120', coastal, inshore, and blue-water vessels. This complete guide to the electrical systems and the electronics for large and small pleasure boats and workboats is a must for all builders, owners and operators, whether they are concerned with new boats or older boats and their maintenance and upgrading. Topics cover everything from diesel engines to refrigeration, and lightning protection to batteries and metal corrosion.

Reprint of the original, first published in 1871.

This book advances our understanding of the place of Latin inscriptions in the Roman world. It enables readers, especially those new to the subject, to appreciate both the potential and the limitations of inscriptions as historical source material, by considering the di-

versity of epigraphic culture in the Roman world and how it has been transmitted to the twenty-first century. The first chapter offers an epigraphic sample drawn from the Bay of Naples, illustrating the dynamic epigraphic culture of that region. The second explores in detail the nature of epigraphic culture in the Roman world, probing the limitations of traditional ways of dividing up inscriptions into different categories, and offering examples of how epigraphic culture developed in different geographical, social and religious contexts. It examines the 'life-cycle' of inscriptions - how they were produced, viewed, reused and destroyed. Finally, the third provides guidance on deciphering inscriptions face-to-face and handling specialist epigraphic publications.

The study of languages forms the foundation of any study of ancient societies. While we are dependent upon archaeology to unearth pottery, tools, buildings, and graves, it is through reading

the documentary evidence that we learn the nuances of each culture--from receipts and letters to myths and legends. And the access to those documents comes only through the basic work of deciphering scripts, conjugating verbs, untangling syntax, and mastering vocabulary. Ancient Language Resources brings together some of the most significant reference works for the study of ancient languages, including grammars, dictionaries, and related materials. While most of the volumes will be reprints of classic works, we also intend to include new publications. The linguistic circle is widely drawn, encompassing Egyptian, Sumerian, Akkadian, Ugaritic, Phoenician, Hattic, Hittite (Nesite), Hurrian, Hebrew, Aramaic, Syriac, Ethiopic, Arabic, Greek, Coptic, Latin, Mandaean, Armenian, and Gothic. It is the hope of the publishers that this will continue to encourage study of the ancient languages and keep the work of groundbreaking scholars accessible. --K. C. Hanson Series Editor
